

Declaration of Sovereignty and Freedom

In this I declare:

The **goal** of my inner and outer work is the complete **activation of my full capacity** into my energy system, my holographic-organic genetics and current vessel to achieve my full capacity in all layers of my existence, and with this align to all my potentials.

I am **not** doing this work to enable any faction, race, clan, group or affiliation to take use of my energy or holographic-organic genetics - from this or other systems - for any reasons or purposes instated by these factions, using old unknown agreements of assistance to do so.

I will **not** in any ways or forms supplement the artificial, organic or inserted creations attached to me, or any other creature or entity exploiting my current form for their own misinformed understandings of any rights to do so. Whatever agreement the former participants of this reality may have done on my behalf are hereby annulled and **do not** stand for my current form, other versions of my form or other re-creations of my form and link up to it.

I hereby declare sovereignty of my form and any other forms of my vessel, energy system and holographic-organic genetics. With this, I will get the information on how to delete all former misuse of my energy system and my holographic-organic genetics, here, there and everywhere, so that I get full control of all that I am and express in this reality and beyond.

I will **not participate** in any forms of ongoing, outdated or new projects with my vessel, my energy system, my holographic-organic genetics and my consciousness. **I hereby declare full sovereignty of my current vessel, my energy system, my holographic-organic genetics and my full capacity consciousness.**

I work to develop my vessel, my energy system, my genetics and my **full capacity consciousness**, and in that I earn all rights of the energy produced as well as all developing of all types and forms of holographic-organic genetics inserted into me. **I hereby declare full ownership** of all that is in my current vessel, my energy system, my holographic-organic genetics and my full capacity consciousness, and from that I can do with this as I see fit.

I hereby **free myself** from all contracts, real or invented, contrived or accepted, false or reversed, and in this enable my current, past and future vessel, its energies, its consciousness, its holographic-organic genetics, its emotions and its mind to fully and freely make my own choices of freedom and sovereignty of what type of evolution I want to participate in.

I hereby declare full freedom and annulment of all contracts for my current vessel, my energy system, its energies, its mind and emotions, all my holographic-organic genetics and my full capacity consciousness.

My work is **not** done to bridge me into any higher reality projects I have no participation in but I do it to **ensure** that the work I am to do here, will reach its fullest completion.

Naturally there will be **no** energy or holographic-organic genetics misuse from this moment on. There will be **no** harvesting or replication, copying, scanning or interference in any ways or forms of my current vessel, my energy system, its energies, its mind and emotions, my holographic-organic genetics and my full capacity consciousness. There will be **no more use** of my vessel, energy system, its energies, its mind and emotions, my genetics and my full capacity consciousness. This goes for all layers of my existence.

There will be **no more insertion** of new or old, foreign or for this system known technology. All inserted technology must be removed at once. This goes for all layers of my existence. The work I do from now on, will free me entirely from all factional work and inclusions, giving me my **full right to be a free and sovereign human in this system**, on this planet and in this reality on all levels of its set up.

My work will ensure that **all** the natural progression features will be **re-instated** into my current vessel, my energy system, its energies, mind and emotions, my holographic-organic genetics and my full capacity consciousness and that **all** energies, and whatever I need for this work of repair and re-instatement, **will come my way**, in terms of securing all needs as well as higher ordered code streams, activation sequences and all the progression methods available on this planet in this system.

There will be **no more** restriction energy or technologies imposed unto me in any ways and there will be no more interfering with me.

I am totally **free to do the progression I choose** to set for myself and the life I choose for myself, no matter what that entails. **All** that I choose will be provided to me.

That is the declaration of sovereignty and freedom for myself and others doing the same level of work and it must be honored and respected due to its origin and purpose for the good of the many and not for the few. **In this upholding and honoring all the laws of this system.** This agreement will cover all ongoing and future projects for all implicated that choose to participate in the same type of work.

And with this declaration I hereby **claim, retract and take back** any releasement codes, attachment points or connection points connecting me to any programs, hidden agendas, emplaced projects, agreements made on my behalf, wrongfully imposed contracts as well as ancient agreements not to be upheld anymore since these races are gone. **This goes for all layers of my existence.**

I hereby stand free and sovereign.
